POWERING POTENTIAL

AGILE SCRUM WORKFLOW

OBJECTIVES

To understand a simple Agile Scrum Workflow

- Set up Trello
- Create a simple workflow
- Add User Stories to the Product Backlog

SIMPLE AGILE WORKFLOW

A simple agile workflow can consist of 4 columns

Product Backlog	Sprint Backlog	Doing	Done
User Story 3	User Story 2	User Story 7	User Story 1
User Story 8	User Story 5		
User Story 6			
User Story 4			

PRODUCT BACKLOG

The Product Backlog is a list of all features, enhancements and fixes to be made to the product in future releases

The feature in this list may need to have a priority, acceptance criteria providing The Definition of Ready State

SPRINT BACKLOG

The sprint backlog is the set of product backlog features selected for inclusion in the sprint

They are DoR (Definition of Ready) and have their acceptance criteria and any other information required.

The development team, scrum master and product owner have selected these features which they believe can be developed within the sprint timeframe

DOING

- When a developer begins to work on a feature then that feature is moved to the Doing List

DONE LIST

A feature is moved to the Done List when the feature is in a state of DoD (Definition of Done)

It has been developed

It has been tested

It has passed acceptance testing

It is ready to be included in an update to the application

TRELLO

Trello is a free Kanban board which can be used to create and apply your simple Agile Workflow

(or any workflow, even your own to-do lists)

- Create a Workspace first and then add a **Board**
- A **Board** can have many **Cards**
- A Card can move between Lists (use drag-drop)
- Board is either private or public
- Public boards can be viewed by anyone but can only be edited by authorized members
